1.What did you do yestarday?

Ana and Karolina tried to solve the problem of the pgadmin on her machine with ubuntu we faced many problems.

We decided to install a virtual machine with debian to test

It is necessary to finish configuring jsf, but it was not possible. We'll try tomorrow.

Zé Rafael and Renato continue to stir wrappers

2.What you do today?

A working team in pairs will try to solve the problems reported above

3. Is there any impediment on your side?
