## What is CSRepo?

CSRepo is a metadata repository for computer science conferences.

### How can you use the CSRepo?

CSRepo will help you to get the metadata of papers that you want to reference in yours articles.

For that you can use 'Conference', 'Papers', 'Authors' and 'Categories' spaces to find the metadata.

You can so use the 'search space' to enter with a specific word. CSRepo will return all related results with what you searched.

### How can I report an error?

You can use the 'Report error' espace, we appreciate any help :)
